

ENERGY BENCHMARKING – HOTELS

Terasen Gas is building a database of information on how natural gas is being used. The aim is to allow our customers to compare their own gas usage against benchmark data. For example, data provided may indicate that a customer is 15% above average usage, in the lower quartile of similar users, or 25% above the benchmark for the sector. This will enable our customers to realize the potential to save gas and help Terasen Gas to provide targeted assistance.

All individual customer data will remain confidential.

CUSTOMER DATA

Name	
Position	
Location / site name	
Phone / fax	
E mail	
Account number	
Gas rate	
Annual Gjs	

KEY DATA FOR BENCHMARKING

Floor area (sq. feet)	
Number of guest rooms	
Number of meals served on average per week	
Approximate area of swimming pool (sq. feet)	
Approximate area of meeting rooms (sq. feet)	
Is gas used for space heating?	
Is gas used for water heating?	
Is gas used for cooking?	

ENERGY BENCHMARKING - HOTELS

	No	Yes	If yes:	
Do you have any sub-metering of gas?				
			How many sub-meters?	
Do you monitor gas usage versus occupancy?				
...versus meals served?				
...versus kg of laundry?				
Is there a building management system?				
Are there separate heating zones for the different hotel areas?				
			How many zones?	
Is it possible to have heating and cooling running at the same time?				
Do you have space heating boilers?				
			How old?	
Do you have domestic water boilers?				
			How old?	
Do you monitor boiler efficiency regularly?				
			How many times / year?	
Are all pipes, flanges and valves insulated in the mechanical room?				
Have you installed low flow shower-heads?				
Are you running any energy saving initiatives now?				
			Which initiatives?	
Do you believe there is scope to reduce your gas usage?				
			% reduction?	

ADDITIONAL NOTES:
